

NURSING (N) - DEGREE COMPLETION*

Alverno's outcome-oriented curriculum is known nationally and internationally for focusing on you, the student. As part of our approach to learning, students learn the essential knowledge within each course subject while also developing the actual skills needed by nurses not just of today, but also tomorrow.

Open to women and men, Alverno's RN to BSN program is personalized and flexible, providing all of the essentials: academic growth, positive cohort support and work-life balance.

In **just 12 months**, you can earn your bachelor's degree in Nursing (BSN) from one of the most respected nursing schools in Wisconsin.

Why a BSN?

At a time when more employers are requiring a BSN, this is your chance to stay one step ahead of industry demands. In fact, the *Future of Nursing* report published by the Institute of Medicine set a bold goal of 80% of nurses having a BSN degree by the year 2020. A BSN also paves the way for advanced degrees and future growth in your career.

Program requirements

- Associate degree in Nursing
- Unencumbered RN license

Convenient class schedule

The program meets online – ensuring you're able to balance work, family and an otherwise busy schedule. Courses last eight weeks.

***This major is suspended and is not currently accepting new students.**
