

# CREATIVE ARTS IN PRACTICE (CAP) MAJOR\*

This major is perfect for students who desire a career in the arts but want to have expertise in multiple areas in order to meet the changing demands of organizations who need multi-disciplined artists and creative thinkers. Students will also learn strategies and entrepreneurial skills necessary to execute and fund their own creative projects.

Students will select two different creative arts tracks, or focus areas, to complement the core work within the major. These tracks include:

- Creative Studies in Writing
- Media Design
- Visual Arts
- Film
- Music
- Theater/Dance

Within this major, students learn to apply and evaluate theories of creativity and problem-solving models within a range of arts experiences and productions. These experiences and productions span cultures and communities as the students creatively and skillfully explore, plan, develop, respond, and reflect on the diversity and interconnectedness of Creative Arts in Practice. Students apply principles of arts entrepreneurship, including funding, business models, branding, and creative renewal within their chosen tracks. As a final showcase of their creative expertise, voice, and professional skills, students create a multiple arts portfolio within a final Creative Arts performance, production, or publication that synthesizes their artistic work in a collaborative setting.

**\*This major is suspended and is not currently accepting new students.**
